

01/Berlin Techno Sessions

Ableton Instrument Racks

Editing Tools:

- Bass / FX Select > Switch between 32 bass and 40 FX shots using this simple dial.
- Filter > A 12-db low pass filter run through the PRD circuit. Warm your sound and tame harsh frequencies with ease.
- Tune (Bass Only) > Stay in key with our +/- 50 Tune parameter.
- Flutter (FX Only) > Add some movement with Flutter. This parameter adds 1/32 LFO to volume, filter and panning.
- Intensity > Dial up the intensity and add filter drive, filter envelope and resonance to your sound in one simple control. (Note: The Simpler version of this rack lacks filter envelope control.)
- ADSR > Use the Attack, Decay, Sustain & Release parameters to take control of the transient character of your audio and tailor it expertly to your production.

Processing Tools:

- Saturate > Dial in extra harmonics and squeeze your sound with our carefully crafted saturation module.
- Tube > Use tube emulation to add extra body, warmth and low end saturation.
- Press > Add some glue or flatten it out with parallel compression.
- LPF / HPF > Use 2-pole high pass and low pass filters to sculpt your sound to perfection.
- Bounce > Add some rhythm with our filtered delay module.
- Room > Add techno-inspired reverb to open up your sound and add an extra dimension.
