

Dusty & Dirty Tops

Ableton 9 Drum Toolkit Rack

Kick start your next drum pattern with our latest Drum Toolkit, exclusive to this release. Push-ready and compatible with Ableton Live 9 and Live 10, this drum rack features 14 macros (8 global, 4 local) to carve, chop, process and switch samples on the fly. Details below.

Drum Pad Macros

These macros are exclusive and affect individual drum pads at the same time, for specific, individual adjustments

- Sample Select Switch between all the one shots for that hit type, includes clicks, noises, percussion, synthetics and more. Multiple pads for each drum type included to layer sounds.
- ADS Controls Take control of your transients with Attack, Decay and Sustain.

Global Macros

These macros are global and affect the whole kit at the same time, for quick and powerful adjustments.

- Filter 12-db / octave Filter set to the MS2 Circuit. Carve away highs and soften your kit.
- Res Resonance control for **Filter**. Reinforce the cut off at low settings, extreme settings will cause a resonant pitch to emerge.
- Drive Add aggression and distortion with the MS2 Filter Circuit.
- Tune Globally retune your hits. For individual tuning, unmap this control from your selected drum pad.
- Saturate Add warmth and distortion with analog-style clipping.
- Vinyl Add low end warmth and high end sizzle with our custom Vinyl patch.
- Over Drive Tear your sound apart with our custom Overdrive patch.
- Carve Enhance your sound with our custom EQ curve.

Please note: The above instruments require Ableton Live 9.7.7 or newer. These racks are compatible with Ableton Live Standard and Suite. The included racks and fx patches can be found in the "ableton drum toolkit" folder in the one shots folder.
